

Environmental policy

Environmental policy

We, the IMPAG company with locations in Zurich, Offenbach, Vienna, Warsaw, Nancy, Paris and Barcelona, with our voluntary certification according to the currently certified DIN EN ISO 14001, make an active contribution to the reduction of the environmental pollution caused by us and at the same time actively improve the reputation of our company and the acceptance by our customers. We also expect economic benefits from the implementation of our environmental goals. Reductions in environmental impact and cost savings are achievable through continuous improvement of our environmental performance. At the same time, we also want to become more interesting for environmentally conscious customer groups.

Our actions are aimed at protecting the environment and environmental resources, promoting the circular economy and largely avoiding waste for disposal. Accumulating waste is returned to the economic cycle and thus to further recycling.

The main goals of our environmental policy are:

Harmonisation of economy and ecology

Compliance with the environmental laws applicable to our company as well as with binding obligations.

Use of the most modern and environmentally compatible technology, equipment and processes within the framework of economic efficiency and common sense

Reduction of existing environmental pollution through e.g.

- Economical use of water, heating and electrical energy
- Proper handling of waste
- Reduction of fuel consumption
- Reduction of pollutant emissions
- Reduction of noise pollution

Avoidance or exclusion of hazards by planning the correct behaviour in hazardous situations in the case of Storage of environmentally hazardous substances

Continuous improvement of our environmental performance and management system
